

# EAL NVQ Diploma in Engineering Maintenance and Installation Level 2

### In a nutshell

This qualification has been developed to enable learners to demonstrate competence in their engineering maintenance occupation. The qualification is applicable to a wide variety of engineering maintenance and / or installation occupations within the sector, dependent on the pathway chosen. We specialise in Mechanical Maintenance.

### This course is for you if...

For those working in engineering maintenance and / or installation occupations within the sector.

### What is expected of me?

This is a National Vocational Qualification (NVQ). It involves the skills and knowledge needed for occupations in engineering maintenance including the ability to organise work and identify and prevent problems.

The learner must present evidence (recorded in a portfolio) which clearly shows they have met the assessment criteria and learning outcomes of the units chosen. The learner must achieve the mandatory and optional units relevant to their pathway and occupational role.

### Additional information

This qualification is delivered in the workplace, not on campus for individuals to attend. Delivery dates are agreed in advance with you and your employer.

This qualification is comprised of 7 units. It may take 7 to 14 months to complete. It is self-paced but our assessor team will put an initial plan in place to complete a unit per month, it is possible to complete it sooner. A formal quote can be issued once we understand your training need but as a guide, we charge £500 per person plus additional awarding body registration fees (circa £80).
